

Word Problem: yard-area

Directions: Use the Design Recipe to write a function 'yard-area', which takes in the width and length of a yard, and returns the area of the yard. (Don't forget: area = length * width!)

Contract and Purpose Statement

Every contract has three parts ...

;

MMMMMMMMMM

:

→

function name

domain

range

;

what does the function do?

Examples

Write some examples of your function in action...

(EXAMPLE (

MMMMMMMMMM

)

function name

input(s)

)

what the function does with those inputs

(EXAMPLE (

MMMMMMMMMM

)

function name

input(s)

)

what the function does with those inputs

Definition

Write the definition, giving variable names to all your input values...

(define (

MMMMMMMMMM

)

function name

variables

)

what the function does with those variables
