

## Combining Images

Complete the following Pyret expression to produce this final image:

```
overlay(1  
  text(2"123 Fake Street", 45, "white"),2  
  overlay(3  
    overlay(4  
      rectangle(5300, 100, "solid", "forest-green"),5  
      rectangle(6310, 110, "solid", "white"),6 4  
      rectangle(7312, 112, "outline", "black")7 3)3)1
```

Look closely at your closing parentheses: how many do you need? Mark each parenthesis you added with the number of the opening parenthesis to which it corresponds.
