The question I chose is
My answer is
The data I would use to support my answer is

Expressions, Values, and Errors

For each expression, if it produces an error when evaluated, write what kind of error occurs:

- For division by zero errors, write "division by 0".
- For errors where the operator is given the wrong type, write "wrong type".
- Otherwise, write what the expression evaluates to.

Expression	Value, or Error?
8 - 5.3	
2 / 0	
"Three" * 2	
(3 + 5) * 3	
1.5 * "6"	
(2 / (3 - (2 + 1)))	

Identifiers and Expressions

Imagine the program below has been written in your definitions window:

$$x = (3 * 2) - 2$$

 $y = x * 1.5$

For each expression, if it produces an error when evaluated, write what kind of error occurs:

- For division by zero errors, write "division by 0".
- For errors where a variable hasn't been defined, write "unbound id"
- Otherwise, write what the expression evaluates to.

Expression	Value, or Error?
У	
x - 3	
(y - 1) * z	
(x + y) / 2	
х + у	

"What is the relationship between calories and sugar?"

hypothesize	
found	

Animals

Animal	Number-of-legs
"Human"	2
"Ant"	6
"Spider"	8
"Bear"	4
"Snake"	0

1. How many rows does this table have?	
--	--

- 2. How many columns does this table have? ______
- 3. What are the names of the columns?
- 4. For the row with value "Human" in the **Animal** column, what is the value in the **Number-of-legs** column?
- 5. Circle the header row of this table

Presidents and Nutrition

Answer the following questions about the presidents and nutrition tables, using your Unit-2 Pyret program:

1.	How many columns does the presidents table have?	
2	What are the names of the columns?	
2.	What are the names of the columns?	
3.	How many rows does the presidents table have?	
4.	Is the party column quantitative or categorical?	
5.	Is the data in the home-state column categorical?	
6.	If so, how many categories are there?	
7.	What is the home state of Millard Fillmore?	
8.	Who was the first president from the Federalist party?	
9.	How many columns does the nutrition table have?	
10.	How many rows does the nutrition table have?	
11.	How many grams of cholesterol does the Hamburger have?	
12.	Which food has the largest serving size?	
13.	Is the data in the calories column quantitative? If so, why?	

Reading Charts

1.	Which menu item has the most sodium?	
2.	Which menu item has the least sodium?	
3.	Do french fries have more sodium than hamburgers?	
4.	Which country has the largest GDP?	
5	What percent of the total world CDP is from China?	

Frequency Bar Chart

First	Last	Eye-Color
"John"	"Doe"	"Green"
"Jane"	"Smith"	"Brown"
"Javon"	"Jackson"	"Brown"
"Angela"	"Enriquez"	"Hazel"
"Jack"	"Thompson"	"Blue"
"Dominique"	"Rodriguez"	"Hazel"
"Sammy"	"Carter"	"Blue"
"Andrea"	"Garcia"	"Brown"

- 1. How many students have Brown eyes?
- 2. How many students have Green eyes?
- 3. How many students have Hazel eyes?
- 4. How many students have Blue eyes?
- 5. Above the "Blue" label on this bar chart, add a bar with height that corresponds to the number of students with Blue eyes.

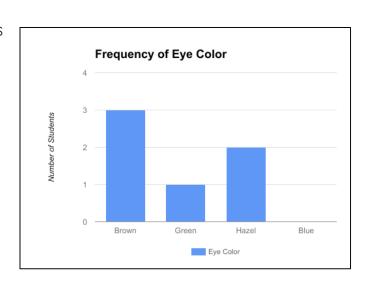

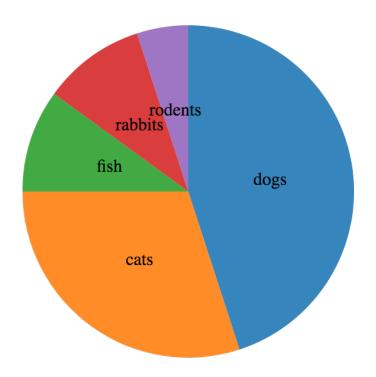

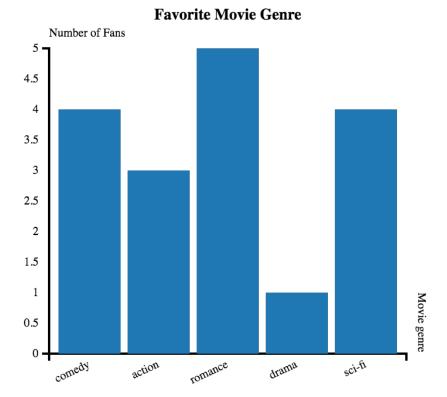

Chart Practice

Pet Ownership

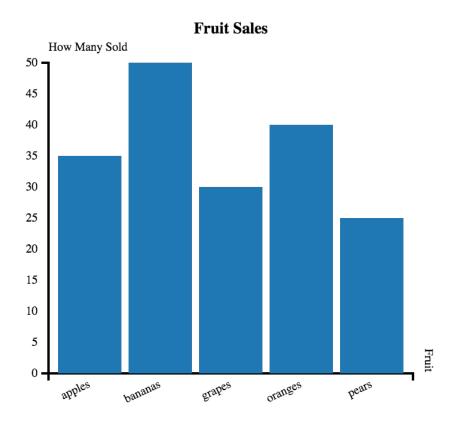

- 1. Is this a pie chart, or a bar chart?
- 2. Which pet is the most popular?
- 3. Which pet is the least popular?
- 4. Which are more popular, fish or rodents?

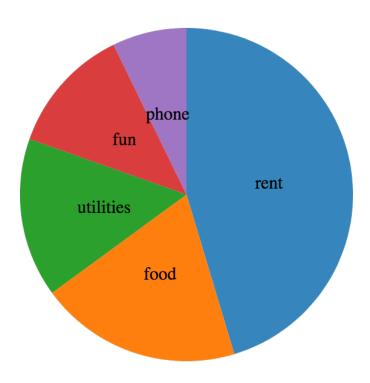

Is this a bar chart or a pie chart?
 What genre is most popular?
 What are the labels of this chart?
 What are the values of this chart?

More Chart Practice

- 2. How many categories of fruit are there?
- 3. How many pears were sold?
- 4. What fruit is least popular?

Monthly Budget

Which expense needs the least amount of money?

2. Which expense takes up almost half of the budget?

3. Suppose a person has a \$2000 monthly budget, and they spend 15% on food. How many dollars is spent on food in a single month? _____

"The average US Household makes more than \$45,000/yr1. So why are so many people living in poverty?"

I hypothesize			
I found			

 $^{^{1}\} https://web.archive.org/web/20060903121944/http://www.census.gov/hhes/income/histinc/h13.html$

Mean, Median, Mode Practice

Using pencil & paper, calculate the 3 numbers that measure the center of each list. If a list contains more than one mode, write the number with the smallest value.

These lists are bound to variables a, b, c, d, e in the Unit 3 template file, so you can check your answers with Pyret.

List	Mean	Median	Mode
a = [list: 1, 1, 4]			
b = [list: 3, 4, 5]			
c = [list: 3, 3, 4, 6]			
d = [list: -1, 0.5, 2, 0.5, 2, 6]			
e = [list: 2, 11, 7, 4]			

Measuring Center in Pyret

1.	What is the mode of the calories-list?	
2.	What is the mean amount of sodium for menu items?	
3.	What is the median GDP for all the countries in countries?	
4.	What is the median of life-expectancy-list?	
lmo	agine the following code is in your definitions window:	
	mystery-list = [list: 1, 2, 3, 4, 5, 6, 7, 8, 9	9]
5.	What is the median of this mystery-list?	
	w imagine these lists (which contain the same elements as myste in your definitions window:	ry-list)
	<pre>mystery1 = [list: 1, 4, 7] mystery2 = [list: 2, 3, 8] mystery3 = [list: 5, 6, 9]</pre>	
6.	What is the median of mystery1?	
7.	What is the median of mystery2?	
8.	What is the median of mystery3?	
9.	What is the median of a list containing these 3 medians?	

Roll two dice, and guess the sum of the roll. Guess right and you win. Guess wrong and you lose.

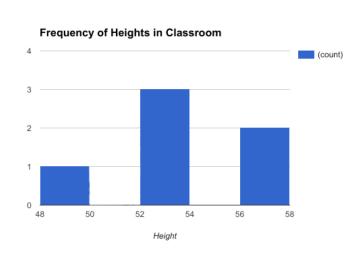

"What are your chances of winning?"

I hypothesize		
I found		

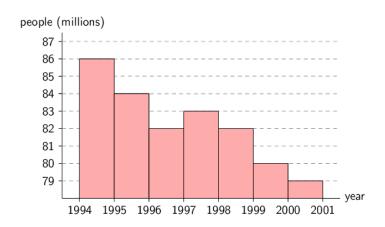

Introducing Histograms

First	Last	Height
"John"	"Doe"	52.0
"Jane"	"Smith"	49.1
"Javon"	"Jackson"	57.7
"Angela"	"Enriquez"	52.5
"Jack"	"Thompson"	53.0
"Dominique"	"Rodriguez"	51.1
"Sammy"	"Carter"	56.2
"Andrea"	"Garcia"	50.8

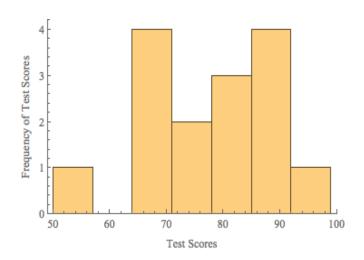

- 1. How many students are between 48 and 50 inches tall?
- 2. How many students are between 50 and 52 inches tall?
- 3. How many students are between 52 and 54 inches tall?
- 4. How many students are between 54 and 56 inches tall?
- 5. How many students are between 56 and 58 inches tall? _____
- Add a bar to this histogram for students who are between 50 and 52 inches tall.

Histogram Practice

- 1. How many people were born between 1996 and 1997?
- 2. On what year were the most number of people born?
- 3. How many bins does this histogram have?
- 4. Were more people born in 1994 or 1995?

- 1. How many bins does this histogram have?
- 2. What is (are) the bins with the highest frequency of scores?
- 3. How many students scored between 85 and 92?

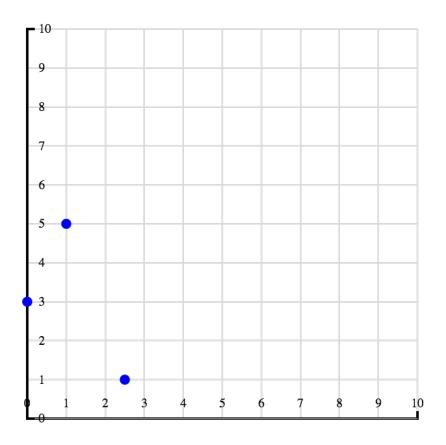

"Are more expensive restaurants generally better than cheaper ones?"

I hypothesize	•••			
I found				

Creating a Scatter Plot

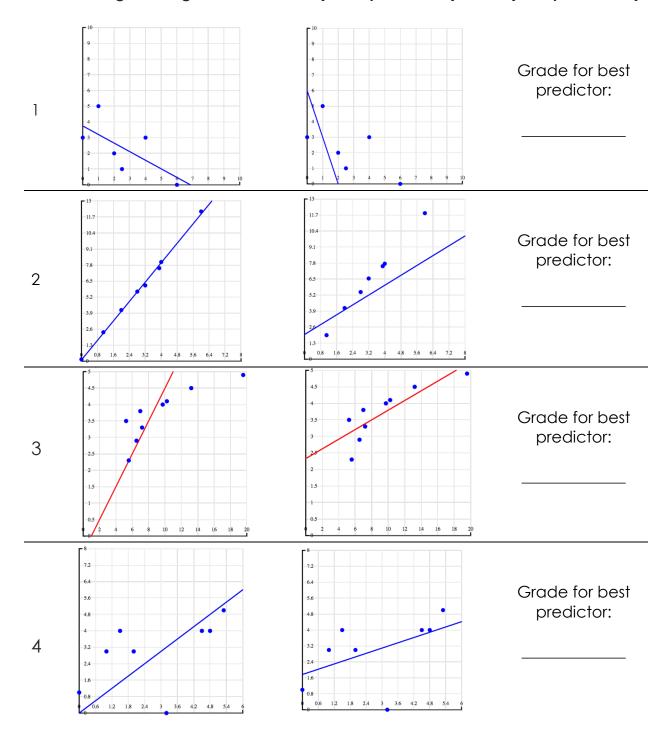

For each row in the following table, add a dot to the scatter plot. The first 3 rows have been completed for you. Use the values from the left column along the horizontal axis, and values from the right column along the vertical axis.

0	3
1	5
2.5	1
2	2
6	0
4	3

Grading Predictor Functions

Below are the scatterplots for 4 data sets, with two different predictors shown for each set. For each data set, circle the plot with the predictor function that fits better, and give it a grade between 0 (worst possible fit) and 1 (best possible fit).

Checking for Understanding

 In your own words, explain what a predictor function is.
2. In your own words, explain what the r-squared value of a predictor is.

Unit 7

Practice with Select

Below is a table bound to the variable name animals.

name	legs	eyes	lifespan
"Human"	2	2	71
"Garden Ant"	6	2	8
"Spider"	8	8	2.5
"Bear"	4	2	10

1	Draw the table	produced by	, this and a	Idan't foract th	a baddar rayyll	
١.	DIGW INE IGDIE	produced by	y II IIS COGE	(4011 101461 1	ie neddel iow:	

select lifespan, name from animals end

2. What code will produce the table shown here?

eyes
2
2
8
2

3. <u>Challenge:</u> Draw table2, produced by this code:

table1 = select name, legs from animals end

table2 = select legs from mystery end

+-	h	1 ~ 2
T.A	\mathbf{n}	10/

Table Plan: Anything Unnecessary?

We can use tables to do all sorts of things – but we need a plan. Each of the following questions involves some subset of the animals table. Read each one carefully, then write a table query that will remove unnecessary columns – keeping only those we need – and binds the new table to a variable you choose.

animals

end

name	legs	eyes	lifespan
"Human"	2	2	71
"Garden Ant"	6	2	8
"Spider"	8	8	2.5
"Bear"	4	2	10

1. We want to make a frequency bar chart showing the distribution of legs

myTable-selected	=
select	from animals
end	
Ma want to make a section	rolet of the relationship between 3
	rplot of the relationship between legs and e

Booleans and Comparison

Suppose your program has the following definitions:

```
legs = 2
eyes = 2
class = "Mammal"
continent = "North America"
```

What will each of the following expressions evaluate to?

Expression	Value
legs <= 4	
eyes == 2	
legs <> 4	
eyes <> 5 - 3	
legs == eyes	

When you finish the first table try these challenge questions:

Expression	Value
class == "Mammal"	
class == "Invertebrate"	
class <> "mammal"	
continent == "Asia"	

Table Plan: Recent Title and Year

Show the title and year for movies released after 2011, in descending order of total gross.

movies

Bad Starter Tables!

For each of the questions below, find out what's wrong with the provided starter table. Write your answer in space below each table.

1. "Make a table of all the presidents, sorted alphabetically by home-state"

nth	name	home-state	yr-started	yr-ended	Party
7	Andrew Jackson	Tennessee	1829	1837	Democratic

2. "Make a table showing only Democratic Presidents"

nth	name	home-state	yr-started	yr-ended	party
7	Andrew Jackson	Tennessee	1829	1837	Democratic
35	John F. Kennedy	Massachusetts	1961	1963	Democratic
11	James K. Polk	Tennessee	1845	1849	Democratic
44	Barack Obama	Illinois	2009	2017	Democratic

3. "Make a table showing the presidents sorted in ascending order of year-started"

nth	name	home-state	yr-started	yr-ended	party
22	Grover Cleveland	New York	1885	1889	Democratic
24	Grover Cleveland	New York	1893	1897	Democratic

4. "Make a table showing all presidents from New York."

nth	name	home-state	yr-started	yr-ended	party
45	Donald Trump	New York	2017	2021	Republican
32	Franklin D. Roosevelt	New York	1933	1945	Democratic
21	Chester A. Arthur	New York	1881	1885	Republican
26	Theodore Roosevelt	New York	1901	1909	Republican

Table Plan: Asian GDPs

Define a table showing the names and GDPs of all countries in Asia, starting with the countries table.

Start out by creating a realistic "starter table", using a sample of rows from the countries table, then a desired "end table" showing only the rows and columns you want, in the order you want them.

countries			asian-GDPs
		†***
