Instructions for Administering Bootstrap Pre/Post Tests (self-printed)

Thanks for helping us collected data from your class!

This bundle contains two sets of pre/post tests: one on solving word problems, and the others on students' understanding of variables. You can give either or both of these, but please don't mix-and-match. We can only use your data if we have both the pre- and post-test from the same topic.

1. In order to respect your students' privacy, we should <u>NOT</u> see their names on the tests. We do, however, need to have the tests matched, so we know which pre goes with which post.

    Please use a unique number for each student, and put that number on the first page of both the pre and post test (so Joe might be #1, Ann might be #2, and so on). This will let us match the scores to the same students.

2. (Optional) If your school or district requires parental consent forms, we have attached a form you can use. Distribute and collect them for each of your students. We do not require these forms.

3. Send the tests back to us, either by postal mail to the address below or by scanning the files into PDFs. Either a single combined PDF or a zip of individual PDFs would be fine.

    If you are mailing the packet, send it to:

    > Bootstrap, c/o Laura Dobler
    > Brown University, Dept of Computer Science
    > Box 1910
    > Providence, RI 02912-1910

Questions? Contact Emmanuel Schanzer (schanzer@bootstrapworld.org) or Kathi Fisler ([kathi@bootstrapworld.org)](mailto:kathi@bootstrapworld.org).

Thanks!
